Frontend Developer

First of all my software past started University. Before that I used to computer but just for playing game. I had a lot of opportunities, because I met the computer at 3 years old but I could not use that very well. That time, I loved playing video games much and I did not research about code ever. But now, if I have a chance, and if I could go back to my past, I would start to learn code in my childhood. Now, I try to improve my code skill every day and I will never stop learning.

Specialties: HTML5, CSS3, SCSS, Bootstrap, TailwindCSS, Terminal, Npm, Node.js

Technologies: Javascript, React, Context API, Git, ES6+

Languages: English: B2, :
